Kakinada, INDIA

Results-driven Software Developer with 4.5+ years of experience in designing and developing responsive web applications using Angular, TypeScript, JavaScript, HTML, and CSS. Seeking a challenging position where I can utilize my technical expertise to build scalable applications and contribute to organizational growth

TECHNICAL SKILLS

- **Frontend:** Angular 16, Angular Material, HTML5, CSS3, TypeScript, NgRx, RxJS
- **Databases:** SQL Server
- **Tools:** GitHub, Postman, SSMS, Visual Studio
- **Reporting:** Power BI

WORK EXPERIENCE

Software Developer- Trayambhu Tech Solutions (TRST01)

Dec 2024 - Present

- Developed and maintained frontend architecture.
- Built dynamic and reusable UI components using Angular, TypeScript, HTML5, and CSS3, ensuring high performance and responsiveness.
- Integrated REST API and FastAPI using Postman for testing and validation, ensuring seamless data flow.
- Implemented real-time dashboards and geospatial visualization modules.
- Collaborated with backend teams to connect MongoDB and SQL databases, managing data fetches and content rendering.
- Utilized GitHub for version control and code collaboration.
- Performed frontend optimization to enhance site speed, accessibility, and cross-browser compatibility.

System Engineer- Infosys Limited

Nov 2021 - Nov 2024

- Develop and Maintain Dynamic Web Applications Using Angular Framework.
- Design and Implement Responsive User Interfaces Using HTML, CSS, And Bootstrap.
- Work with TypeScript and JavaScript to Build Scalable and Efficient Front-End Solutions.
- Integrate Restful Apis and Backend Services with Angular Applications.
- Develop Reusable Components, Modules, And Services for Better Code Maintainability.
- Collaborate with Ui/Ux Designers, Backend Developers, And QA Teams to Deliver High-Quality Applications.
- Optimize Applications for Maximum Speed, Performance, And Scalability.
- Debug, Troubleshoot, And Fix Front-End Issues and Bugs.
- Use Git or Other Version Control Systems to Manage Code Changes.
- Participate in Code Reviews, Testing, And Deployment Activities.
- Ensure Applications Follow Best Coding Practices and Security Standards

PROJECTS

TRST01 Chain Mees

- Developed and maintained a single Angular codebase customized for 5 different client websites.
- Implemented client-specific UI and functional changes (forms, workflows, validations, dashboards).
- Handled requirement analysis and translated client needs into Angular components.
- Ensured code reusability and performance optimization.
- Fixed bugs and handled production issues across all client deployments.
- Collaborated with backend and QA teams for smooth releases.

TRST01 Remote Sensing Portal

- Developed the GIS Watch web platform for Trst01, enhancing geospatial intelligence and promoting sustainability.
- Built responsive and interactive UI components, driving user engagement through dynamic content integration.
- Integrated APIs to streamline data retrieval and ensure real-time updates for users.
- Ensured a seamless user experience by leveraging modern web technologies and best practices in design.

REC Tokenization Portal

- Developed a web application for the tokenization of Renewable Energy Certificates, enhancing market accessibility for users.
- Created responsive user interfaces and dashboards using modern web technologies, ensuring a seamless user experience.
- Integrated backend APIs and optimized application performance, resulting in faster load times and improved user satisfaction.

Movement Mortgage

- Developed Responsive and Dynamic UI Components Using Angular.
- Implemented Forms and Validation for Loan Application Processes.
- Integrated Restful Apis to Fetch and Submit Customer and Loan Data.
- Built Reusable Components, Services, And Modules to Improve Application Performance.
- Collaborated with Backend Developers And UI/UX Teams to Enhance User Experience.
- Implemented Data Binding, Routing, And State Management in Angular Applications.
- Fixed UI Bugs and Improved Application Performance and Responsiveness.
- Used Git for Version Control and Participated in Code Reviews and Deployments

Bank of America

- Developed and Maintained Web-Based Banking Applications Using Angular Framework.
- Designed Responsive User Interfaces Using HTML, CSS, Bootstrap, And Angular Components.
- Implemented Secure Login, Dashboard, And Account Management Features for Banking Users.
- Integrated Restful Apis to Retrieve and Update Customer Banking Data.
- Developed Reusable Components, Modules, And Services to Improve Code Reusability.
- Implemented Angular Routing, Forms, And Validation for Seamless User Experience.
- Worked Closely with Backend Developers, Testers, And Business Analysts to Deliver Project Requirements.
- Fixed Bugs, Performed Code Optimization, And Ensured High Performance of The Application.
- Used Git for Version Control and Participated in Code Reviews and Agile Ceremonies.
- Ensured Application Followed Security Standards and Banking Compliance Requirements.

EDUCATION

B. Tech / B.E. | Mechanical - 2021
Pragati Engineering College, Kakinada
Grade - 7.9/10

Intermediate| MPC - 2017
Narayana Junior College, Kakinada
Grade – 95.4%

SSC - 2015
S.F.S EM High School, Pithapuram
Grade - 8.8/10
