Kakinada, INDIA

Results-oriented Software Developer with 4.5+ years of experience building responsive and scalable web applications using Angular, TypeScript, JavaScript, HTML, and CSS. Skilled in developing user-centric interfaces, integrating APIs, optimizing application performance, and collaborating with cross-functional teams to deliver high-quality solutions. Passionate about leveraging modern technologies to create efficient applications.

TECHNICAL SKILLS

- **Frontend:** Angular 16, Angular Material, HTML5, CSS3, TypeScript, NgRx, RxJS
- **Databases:** SQL Server
- **Tools:** GitHub, Postman, SSMS, Visual Studio
- **Reporting:** Power BI

WORK EXPERIENCE

Software Developer- Trayambhu Tech Solutions (TRST01)

Dec 2024 - Present

- Contributed to frontend architecture improvements for enterprise applications.
- Created reusable and responsive UI components using Angular, TypeScript, HTML5, and CSS3 to improve maintainability and performance.
- Connected frontend applications with REST APIs and FastAPI services, ensuring smooth data exchange and functionality.
- Delivered real-time dashboards and geospatial visualization features for monitoring and analytics.
- Worked closely with backend teams to integrate MongoDB and SQL databases for efficient data retrieval and presentation.
- Managed source code and collaboration workflows using GitHub.
- Improved application speed, accessibility, and cross-browser compatibility through continuous frontend optimization.

System Engineer- Infosys Limited

Nov 2021 - Nov 2024

- Developed and enhanced dynamic web applications using Angular and related frontend technologies.
- Designed responsive user interfaces that provided a seamless experience across devices and browsers.
- Utilized TypeScript and JavaScript to build scalable, maintainable, and efficient frontend solutions.
- Connected Angular applications with backend services and RESTful APIs.
- Structured reusable components, modules, and services to improve code quality and maintainability.
- Partnered with UI/UX designers, backend engineers, and QA teams to deliver reliable software solutions.
- Enhanced application performance, scalability, and responsiveness through continuous improvements.
- Investigated and resolved frontend issues to ensure smooth user experiences.
- Managed source code using Git and actively participated in code reviews and deployment activities.
- Followed coding standards, security guidelines, and industry best practices throughout development.

PROJECTS

TRST01 Chain Mees

- Delivered client-specific enhancements, including forms, workflows, validations, and dashboard functionalities.
- Analysed business requirements and translated them into efficient Angular-based solutions.
- Improved application maintainability through reusable component development and performance-focused implementation.
- Resolved production issues and provided ongoing support across multiple client deployments.
- Coordinated with backend and QA teams to ensure smooth releases and quality delivery.

TRST01 Remote Sensing Portal

- Contributed to the development of the GIS Watch platform, supporting geospatial intelligence and sustainability initiatives.
- Designed responsive and interactive user interfaces that improved engagement and usability.
- Integrated APIs to enable efficient data retrieval and real-time information updates.
- Applied modern web development practices to deliver a consistent and intuitive user experience.

REC Tokenization Portal

- Developed a web platform for Renewable Energy Certificate tokenization, increasing accessibility and transparency for users.
- Designed responsive dashboards and user interfaces using modern frontend technologies.
- Integrated backend services and optimized application performance to reduce load times and improve user satisfaction.
- Enhanced overall usability through efficient data handling and streamlined workflows.

Movement Mortgage

- Created responsive and interactive user interface components using Angular.
- Implemented form-based workflows and validation mechanisms for loan application processes.
- Integrated APIs to manage customer and loan-related data transactions.
- Built reusable modules, services, and components to improve maintainability and performance.
- Worked closely with backend and UI/UX teams to enhance application functionality and user experience.
- Implemented routing, data binding, and state management features within Angular applications.
- Addressed UI issues and optimized responsiveness across different devices and browsers.
- Participated in code reviews, deployments, and version control management using Git.

Bank of America

- Contributed to the development and maintenance of web-based banking applications using Angular.
- Designed responsive interfaces and reusable Angular components to support banking operations.
- Implemented secure login, dashboard, and account management functionalities.
- Connected frontend applications with backend services to retrieve and update customer information securely.
- Developed reusable modules and services to improve code consistency and scalability.
- Built forms, validations, and routing features to ensure a seamless user journey.
- Collaborated with business analysts, testers, and backend developers to meet project objectives.
- Improved application performance through bug fixes, code enhancements, and optimization efforts.
- Participated in Agile ceremonies, code reviews, and release activities while adhering to banking security and compliance standards

EDUCATION

B. Tech / B.E. | Mechanical - 2021
Pragati Engineering College, Kakinada
Grade - 7.9/10

Intermediate| MPC - 2017
Narayana Junior College, Kakinada
Grade – 95.4%

SSC - 2015
S.F.S EM High School, Pithapuram
Grade - 8.8/10
